

Emissions Trading – Learning from Germany’s Experiences

A Breakfast Dialogue with the Private Sector

27.01.2016

Mexico City, Hacienda de los Morales

Av. Juan Vázquez de Mella 525, Miguel Hidalgo, Del Bosque, 11510 Mexico City, D.F

An Emissions Trading Scheme (ETS) is an instrument that requires the participation of the private sector to achieve its operation. For this reason it is envisaged to enter into a dialogue between different private sector representatives and German experts in order to exchange lessons learned on the implementation of market instruments and the preparation of the industry to participate in an ETS.
